

## How to setup Kaspersky Internet Security 6.0

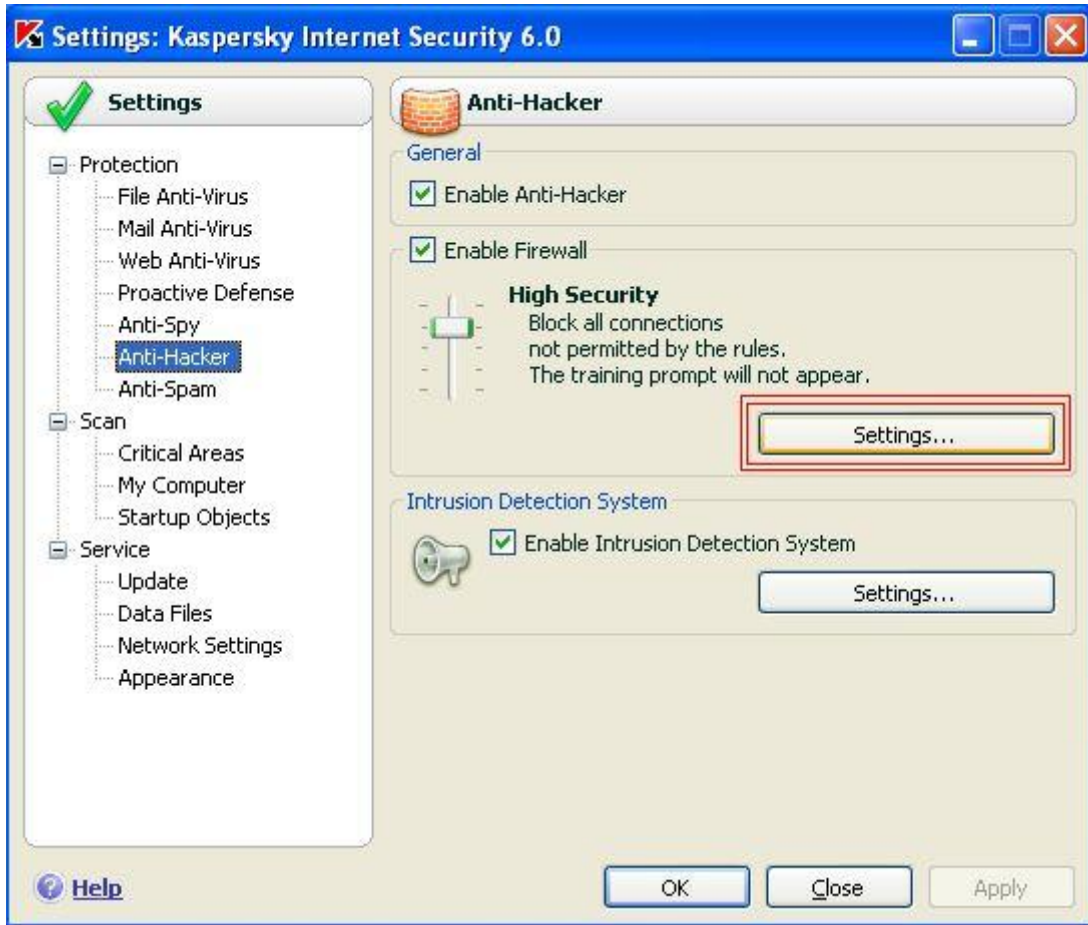

1. Close all the programs and open Kaspersky

You will see the following picture:

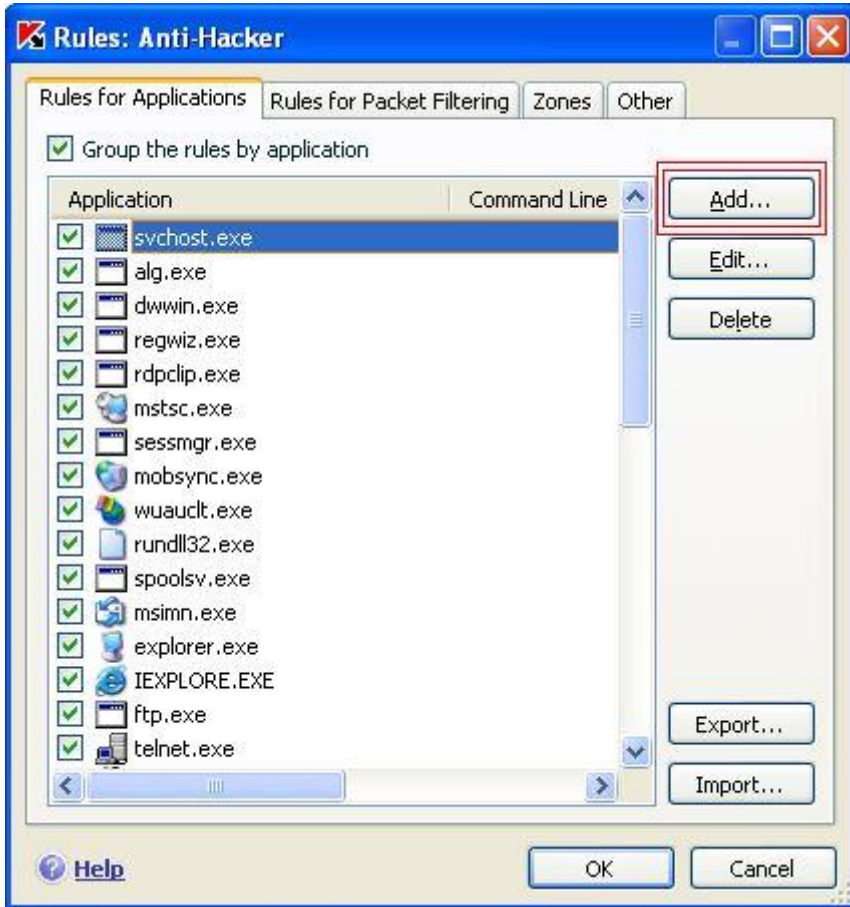

2. In the menu on the left hand side (under the umbrella) please choose "Anti-Hacker" and then on the right panel click on the link to "Firewall"

After that the program will look like this:

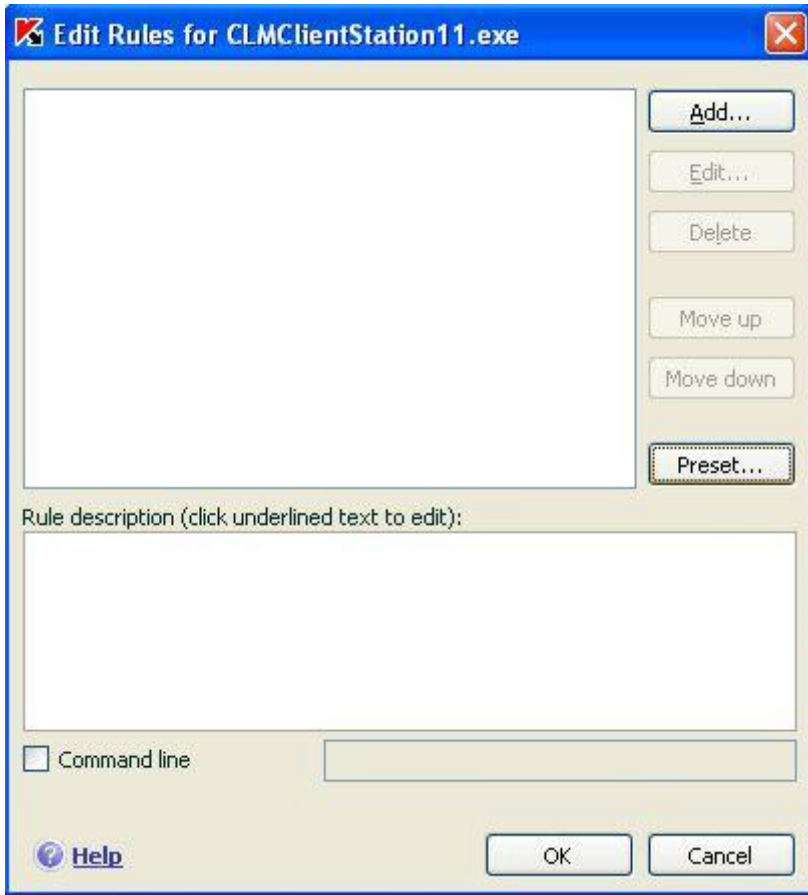

3. Please press the button "Settings" as it is shown on the picture above. You'll see the following window:

4. Here you can see the list of the programs installed on your PC. Click the button "Add" shown on the picture, the "Browse" from the dropdown menu, and specify the installation folder of Saxotrader2 (typically at c:\program files\Saxo Bank\SaxoTrader2) and select file IitClientStation2.exe.

5. When you will choose this file, the following window will appear (**note on your screen, the title of the window should be Edit Rules for IitClientStation2.exe**):

6. Click "Preset" and choose "Allow all" from the dropdown menu and then press OK and OK and "Apply" and one more time OK.
