

How to set up ZoneAlarm Pro.

1. During installation of SaxoTrader2, ZoneAlarm will send below security alert. Tick **Apply this setting to all suspicious behaviors exhibited by this application** and click **Allow**

2. New alert will pop up. Tick **Remember this setting** and click **Allow**

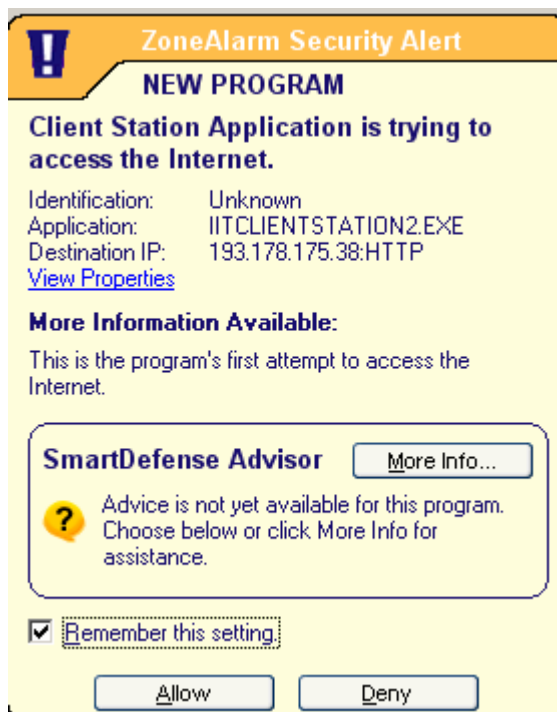

3. Alert pops up again, tick Tick **Apply this setting to all suspicious behaviors exhibited by this application** and click **Allow** to continue the installation

You might still get alerts when start launching Saxotrader2

1. When SaxoTrader2 is launched, ZoneAlarm will send the below security alert regarding application IitClientStation2.exe. Tick **Remember this setting** and click **Allow**

2. After clicking Download to get the update, ZoneAlarm send another security alert as below. Tick **Apply this setting to all suspicious behaviors exhibited by this application** and click **Allow**

3. In case you click Deny by accident, you can reconfigure it by clicking ZoneAlarm icon and below window will open. Click **Program Control –Program** and find and highlight **Client Station Application** and right click under **Access**, click **Allow**
